Resources

Subsequent to the end of the half year, an updated JORC 2012 compliant resource estimate for the Hengjaya mine was reported as follows:

Category	Dry Tonnes (million)	Ni (%)	Co (%)	Fe (%)
Measured	20	1.3	0.08	28
Indicated	109	1.3	0.08	29
Inferred	56	1.3	0.07	27
Total	185	1.3	0.08	28

The 185 million dry metric tonnes ('dmt') at 1.3% nickel and 0.08% cobalt (cut-off 0.8% nickel), representing 2,405,000 tonnes of nickel and 148,500 tonnes of cobalt, is from an area of 1,144 hectares of the 5,983 hectare Hengjaya mine tenement area.

The updated resource exceeds the previous resource estimate reported in December 2018 which covered an area of 1,919 hectares. Further, Measured and Indicated resources have increased 185% and 117% respectively with a 49% decrease in Inferred resources, providing very strong resource confidence.

High grade saprolite resource of 39.7 million dmt at 1.8% nickel (cut-off 1.5% nickel), represents more than 15 years of ore supply to the Hengjaya Nickel and Ranger Nickel RKEF projects' total combined ore requirements of approximately 2.6 million dmt per annum.

NICKEL MINES LIMITED
and its controlled entities

DIRECTOR'S REPORT

In addition to the updated Mineral Resource, at least five significant Exploration Targets, covering a further 1,500 hectares within the Hengjaya Mine licence area have been identified in locations where similar type nickel laterite deposits of between 60 - 120 million wet metric tonnes is postulated. In these areas nickel laterite has already been identified by surface mapping and wide spaced drilling.

An Exploration Target is a statement or estimate of the exploration potential of a mineral deposit in a defined geological setting where the statement or estimate, quoted as a range of tonnes and a range of grade, relates to mineralisation for which there has been insufficient exploration to estimate a Mineral Resource. The potential quantity and grade of the Exploration Target is conceptual in nature, as there has been insufficient exploration to estimate a Mineral Resource and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

Mining

Production totalled 212,568wmt for the six months to 30 June 2020, at an average stripping ratio of 2.2:1.0. Sales for the half year totalled 209,628 wmt at an average grade of 1.81%.

Overburden included limonite ore which has been stockpiled adjacent to waste dumps at both Bete Bete and Central Pits in readiness for eventual supply to the IMIP's HPAL projects. As at 30 June 2020, 368,120 wmt of limonite ore grading approximately 1.2% nickel had been stockpiled.

Tonnes mined	wmt	149,958	62,610	212,568
Overburden mined	BCM	179,524	150,817	330,341

Average price received	US\$/t	24.32	23.79	23.64
Average cost of production⁽²⁾	CIF US\$/t	29.70	44.73	34.17

⁽¹⁾ Strip ratio includes limonite as overburden.

⁽²⁾ Average cost of production includes amortisation and depreciation costs for the 6 months of \$2.81/t.

First ore from the Central Pit was mined and trucked to the jetty for barging in early April, however, mine production during the remainder of the June quarter was severely impacted by an above-average wet season. Heavy rain and localised flooding materially impacted mining activities and caused delays to the planned ramp-up of operations at the Central Pit.

With the abatement of the wet season and the return to more normal operating conditions (commencing from around the middle of July) all expansion initiatives and logistics are in place to see a future increased mining production.

The Company continues to stockpile limonite ore which is mined as an overburden material of its saprolite mining operations. By the end of June 2020, a total of 400,033 wmt of limonite ore, grading approximately 1.2% nickel, had been stockpiled adjacent to waste dumps at Bete Bete and Central Pits.

The Company is positioned to become a material supplier of limonite ore to several of the HPAL plants currently under construction within the IMIP.

DIRECTOR'S REPORT

Mine Expansion

Expansion of the Hengjaya Mine operations commenced in late 2019 to facilitate significantly increased production levels and are now materially complete.

Mining operations at the Central Pit commenced in April 2020 and the expanded jetty capacity is now fully operational and capable of berthing 10,000 tonne barges. Haulage from the Central Pit to the Company's jetty is approximately 6km less than from the previously mined Bete Bete Pit and will allow for the use of much larger 40 tonne trucks (previously 8 tonnes), significantly improving transport efficiencies and reduce mining costs.

In addition, construction of the new mine camp and associated infrastructure, including technical offices and workshops, community relations centre, training and recreational buildings and a mosque have been completed.

Mining in the Central Pit in mid-July upon the abatement of the wet season.

Exploration

During the half ground penetrating radar ('GPR') surveys were completed over 35 kilometres in and around the Central pit area in advance of further drilling. Initial results were extremely promising showing good thickness of limonite and saprolite orebodies throughout a majority of the IPPKH1 and IPPKH2 areas.

Resource drilling saw 467 holes completed for 9,593 metres. The program included infill drilling at the Central Pit area to enhance mine planning and scheduling and to assist with planning for the separation of limonite and saprolite ore.

Data from these exploration activities contributed to the updated resource estimate.

The drilling program is planned to continue throughout 2020 targeting new areas of limonite and saprolite ores identified by the GPR. In addition to nickel ore exploration, preliminary work has commenced on identifying significant quality mineable limestone deposits inside IPPKH1 which may be used for future off-take agreements for HPAL projects and main haul road construction works between the Hengjaya Mine and the IMIP.

**NICKEL MINES LIMITED
and its controlled entities**

DIRECTOR'S REPORT

Extensive drilling has now been completed across a majority of the Hengjaya Mine tenement.

Hengjaya Mine to IMIP Haul Road

Construction works on a haul road from HM mine to IMIP commenced during the period with 5.4km of pilot road currently completed and construction of the haul road works approximately 30% into the program at the end of the period. Once completed, this haul road will allow both saprolite and limonite ore from Hengjaya Mine to be hauled directly to IMIP. An internal haul road connecting the Bete Bete pit and Central Pit and jetty was commenced during the period and is aiming to be completed by October 2020, this haul road will provide the opportunity to further increase production and blend ore (if required) from current and future pit locations, enabling further optimisation of the Hengjaya Mine resource potential.

Safety, Environment and Community

There were no lost time injuries or high potential incidents reported during the six months to 30 June 2020.

The record operating performance of both the Hengjaya Nickel and Ranger Nickel projects were achieved across the Chinese New Year season and against the backdrop of the emergence of the COVID-19 global pandemic from mid-January. Early recognition of the potential impacts of COVID-19 and the prompt implementation of strict access controls and health and safety measures to ensure the health and wellbeing of all its workers have ensured the continuation of normal, uninterrupted operations to date.

Training of staff and contractors in safe operating practices continues on a regular and routine basis. Additional safe operating procedures continue to be developed including the review of all incoming mining fleet, associated risk management assessments and requirements.

No environmental incidents were reported during the six months to 30 June 2020, with work continuing to complete final landform contouring, drainage improvements and rehabilitation of previously mined production areas. Site rehabilitation continued at the Bete Bete waste dump areas with the Group continuing with its involvement in numerous local and regional rehabilitation programs.

As part of the Group's commitment to the local community, other potential, longer term sustainability programs in the local and regional areas continue to be assessed.

The Directors of the Group are responsible for:

- the preparation of the Interim Financial Report that gives a true and fair view in accordance with *Australian Accounting Standards* and the *Corporations Act 2001*; and
- such internal control as the Directors determine is necessary to enable the preparation of the Interim Financial Report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

Auditor's responsibility for the review of the Interim Financial Report

Our responsibility is to express a conclusion on the Interim Financial Report based on our review. We conducted our review in accordance with *Auditing Standard on Review Engagements ASRE 2410 Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the Interim Financial Report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the Group's financial position as at 30 June 2020 and its performance for the half-year ended on that date; and complying with *Australian Accounting Standard AASB 134 Interim Financial Reporting* and the *Corporations Regulations 2001*. As auditor of Nickel Mines Limited, *ASRE 2410* requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of an Interim Financial Report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with *Australian Auditing Standards* and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*.
